ABOUT ME

As a full-stack web developer with a teaching, marketing, and music background, I bring a *unique* perspective to my field. I believe that user-centered design is the key to creating *engaging* and *compelling* web experiences. Whether it's designing intuitive interfaces or optimizing website performance, my goal is to make web experiences that are both visually stunning and highly functional. I am highly motivated and constantly take action to learn new concepts through creating and self-studying.

WEB PROJECTS

Pluto | <https://www.pluto-pets.me/>

- Le Wagon capstone project; acted as lead developer
- Mobile first web app for managing your pet's life (Ruby on Rails, PostgreSQL, Heroku, Line Communication API)
